

- medical advancement
- test subjects → human
- side effects → animal.

Example: WWII concentration camps

- Cloning → Chemotherapy
- Biological weapons
(gas, anthrax, nuclear weapons)
- Genetic tailoring
- Abortions
- Steroids

For each section, choose 2 of the questions and write a 150 word answer for each.

Section 1: Response to the article on Orthorexia

1- Do you think calorie counting can turn into an eating disorder? Why or why not?

2- To what degree do you think the media has an impact on eating disorders and our perception of "healthy bodies"?

3- Do you think that eating and drinking are important social aspects of our lives? How does this help with nutrition? How does it hurt?

Section 2: Response to "Sugar Rush"

1- Did you find any of the stats on sugar consumption or diabetes shocking? Why or why not?

2- Even though companies are not supposed to advertise health risk products to children, do you think that they still do?

3- What did you think about the idea of the tax on sugar products and giving the money to the health care system? Do you think this would work? Why or why not?
